This map was designed to show general locations of OHV recreation sites in Oregon. For specific directions to the site, please contact the land manager contacts found on the back of this map.

Before you go, contact the local agency office for site specific maps and other information necessary to plan a safe and fun trip.
Recreation Permits

Be aware that some areas may require a day-use permit. Each site has its own policies governing rates, locations, and activities covered. Please contact the local land manager to see if the site you want to go to requires a pass (see below).

Your purchase of an ATV operating permit generates funds to develop and maintain ATV riding areas in Oregon. You must display the ATV permit if you operate an ATV in areas specifically designated for ATV use. There are three classes of ATVs:

Permit vendors
To find a permit vendor in your area, call 1-800-551-6949 or go to http://atv.prd.state.or.us/permits.php

Class I Permit
Defined:
- For vehicles 50” wide or less, AND
- Dry weight of 800 pounds or less.
- Have a saddle or seat.
- Tires on three or four tires.

Operating requirements:
- Have a valid driver’s license, OR
- Have an ATV operator permit (this is not the operating permit described above. The operator permit can only be obtained by successfully completing an ATV safety education course), OR
- Be accompanied by someone 18 years or older who meets one of the above requirements.

Class II Permit
Defined:
- For vehicles more than 50” wide, OR
- Dry weight of more than 800 lbs., but less than 8,000 lbs.

Operating requirements:
- A valid driver’s license.

Class III Permit
Defined:
- For vehicles riding on two tires, AND
- Dry weight of less than 600 pounds

Operating requirements:
- Be at least 7 years old, AND
- Have a valid driver’s license, OR
- Have a special ATV operator permit (this is not the same thing as the operating permit described above. The operator permit can only be obtained by successfully completing an ATV safety education course), OR
- Be accompanied by someone 18 years or older who meets one of the above requirements.
- Riders who are at least 7 but younger than 12 years old must have both an ATV operator permit and be accompanied by someone at least 18 years old that has a license or an ATV operator permit.

Regulations limit noise output from ATVs to a maximum of 90 decibels at 20 inches from the exhaust opening. Several areas, however, have more restrictive limits. Be sure to inquire at the local office if additional restrictions apply.

Spark Arrester Regulations:
Riding ATVs in forested areas requires the use of US Forest Service-approved spark arrester exhaust systems, at least April 1 – October 31. However, some trail systems may have more restrictive dates. Check at the local agency’s office to be certain about the exact dates.

Riding areas may be closed due to extreme fire danger. Always check with local agencies.

---

**Sound Decisions:**

Regulations limit noise output from ATVs to a maximum of 90 decibels at 20 inches from the exhaust opening. Several areas, however, have more restrictive limits. Be sure to inquire at the local office if additional restrictions apply.

DESCRIPTION: 90,000 acres open to Class I and II ATV’s with all degrees of difficulty.
COMMENTS: Full facilities available at nearby campgrounds. Map available from local USFS offices.
SEASON: All year.

WINOM-FRAZIER

WALES NATIONAL FOREST

North Fork John Day Ranger District
PO Box 179
Ukiah, OR 97882
Phone: (541) 427-3311

La Grande Ranger District
21060 Hwy 30
La Grande, OR 97850
Phone: (541) 985-1186

WEBSITE: www.fs.fed.us/r6/uma/index.html

LOCATION: 35 miles west of La Grande, and 12 miles east of Ukiah. Access south of Highway 244 from US 62 Road.
DESCRIPTION: 140 miles of trails. Easy to most difficult.
COMMENTS: Campground facilities nearby. Map available from local USFS office.
SEASON: All year.

Your ATV Funds at Work

ATV PROGRAM OVERVIEW

The intent of the ATV grant program is to provide opportunities for high-value recreation. The ATV grant program is designed to supplement projects and is not intended to be the sole source of funding for ATV projects. Funds are allocated through the ATV grant program to eligible sponsors, which include managers of publicly and privately held land, registered C5F clubs, non-profit organizations, and law enforcement agencies.

ATV ACCOUNT ALLOCATION COMMITTEE (AAC)

The ATV Account Allocation Committee (AAC) is made up of a volunteer committee to CONR for the purpose of recommending ATV grant funding. The committee represents all three classes of ATV vehicles.

ATV FUNDING

The ATV Account provides for your ATV Grant is used to help provide you with areas to ride. Funding comes mainly from ATV users and abandoned fuel taxes from ATV users.

TYPES OF PROJECTS

Development: New trail construction, bridges, trail signs,休息 stops, shoulder facilities (Class I projects) and many campgrounds and staging areas such as Benson Camp, Bald Butte (D105A), and Stryker some funded with ATV students.

Law Enforcement:

Officers are funded to help ensure that your riding trip is safe and enjoyable. Not only do they make sure that riders play by the rules, but they also ensure legal activities in ATV areas, such as theft, vandalism and drug smuggling. Most of the officers you see can provide you with up-to-date area information or a map.

First Aid Services:

ATV clubs help provide medical assistance to injured riders. If the extent of injuries cannot control, special medical care was purchased to help treat patients. In other areas, funds can used for first aid packets.

Acquisitions:

Land can be purchased or leased for ATV riding development. For example, GPJ acres were purchased in Morrow County in 2003. Almost 160 plus miles of newly developed trail and a new camping staging area are available for eastern Oregon.

Operation and Maintenance:

Many riding areas need some level of maintenance. Trail work can be closed due to severe storms. ATV clubs have paid for trails maintenance during timber sale timber. ATV users help to maintain level of trail maintenance during trail maintenance and easement or new hoping, relocations, reconstruction water bar, and the protection of work, which makes the trail more fun to ride and helps protect the environment.

Safety and Education:

ATV funds help teach people to ride safely and properly. Grant dollars help pay for ATV training at a reduced cost. The development of the Outdoor Training Center in Millican is also an example of an ATV grant project.

Infi rct

Operators of Class I and II ATVs that are younger than 16 months are a Department of Transportation approved infant.

MATTHEWS

In Oregon, they must be maintained at 18-21 speed. In Oregon, they are equipped at St. Paul Lake (240 ft.) and the Oregon Dunes National Recreation Area (50-80 ft).

Lights

Lights can be limited visibility, such as before sunrise, after sunset, or when you cannot see clearly through distance. You may need to see clearly through distance.

Tags

You may need to see clearly through distance. You may not be able to see clearly through distance. Your tag may be restricted to roads only or even banned all together. Never leave your ATV unattended. Most areas require that passenger vehicles use a shield, and the alpine or waterfront (water damage) may need a 20 miles southwest of Unity.

WINDSOR, CA

You may cross a highway 100 feet away from intersection, at a 90 degree angle, and after making a complete stop. You cannot make a complete stop after you have made a turn.

Crossing Railroads

You may cross traffic only at established crossings.

CROSSING HIGWAYS

You may cross a highway in a 100 feet away from intersection, at a 90 degree angle, and after making a complete stop. You cannot make a complete stop after you have made a turn.

Crossing Railroad Tracks

You may cross railroads only at established crossings.
